

Awakening Eden

Design Bible v3.1

SOLAR - ROOTED - HUMAN - LIVING

A complete design system for the Living Library, regenerative landscapes, guides, community and future experiences.

Leave life more alive.

A living field journal from a regenerative future.

Awakening Eden should feel calm enough to trust, alive enough to explore, practical enough to use and beautiful enough to slow people down.

Earth

Soil, water, roots, fungi, Mediterranean plants, real projects and regenerative practice.

Human

Hands, learning, tea, teaching, play, imperfection, community and genuine relationship.

Luminous

Sun for action. Moon for reflection. Sacred geometry as quiet connective poetry.

One identity, three layers, four atmospheres.

Primary identity

Tree + heart + roots. The recognisable mark in navigation, footer, favicon and social identity.

Portal identity

Sun + tree + heart + sacred geometry + lotus. Used only for thresholds and covers.

Human identity

Rooted person + seed + heart + water. Inner and outer regeneration held together.

Atmospheres: Sunrise for invitation and action / Earth for practical land work / Garden for learning and community / Moonlit for reflection and closing.

FLAGSHIP VISUAL

Solar Tree-Heart-Lotus Portal

The great threshold image: awakening, photosynthesis, belonging, roots, water, relationship and emergence.

Use once per page at most. It is not the small logo.

The mark must survive at 32 pixels.

Navigation

Use the simplified SVG mark beside live HTML words: Awakening Eden / The Living Library.

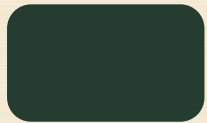

Footer

One centered reversed mark at 56-72 px. No duplicate lockup, stretching or dark-on-dark raster.

Minimum clear space: one heart-width on every side. Never place the detailed painted portal in the header or favicon.

COLOUR

Earthy, playful and colourful - still grounded.

Forest

Teal

Moss

Parchment

Terracotta

Honey

Rose

Lavender

Recommended page ratio: 55% parchment and breathing space / 20% forest and moss / 10% teal and water / 10% terracotta and honey / 5% rose and lavender accents.

Day rhythm

Parchment, honey and terracotta lead action, learning and practical possibility.

Night rhythm

Deep forest and moonlit teal hold reflection, heart, breath and quiet endings.

Poetic headings. Plain-language guidance.

Cormorant Garamond

Source Sans 3 - clear, warm, highly readable

Caveat - one human note, used sparingly

Rules

Body 17-20 px on mobile; 1.55-1.7 line-height; 45-75 characters per line. Avoid centered text walls, faint olive body copy and decorative type inside controls.

Flowing, not floating everywhere.

Section space

72-112 px desktop and 48-72 px mobile.
Let one major idea breathe.

Corners

Organic 18-28 px radii on large cards; pill shapes only for small actions and labels.

Geometry

Use flowing curves and quiet circle systems at thresholds. Interface grids remain orderly and accessible.

Density rule: one major artwork plus one or two small accents per viewport. Dense content receives less decoration.

Threshold - proof - pathways - depth - invitation.

Threshold

One clear promise

Proof

Real land or trusted guide

Pathways

Three or four useful doors

Depth

Expandable learning

Invitation

One next action

Mobile rule: meaning before explanation. The visitor should understand the page and see a useful action within the first screen or clearly entering it.

The whole page becomes a living journey.

1. Solar portal + promise + two actions
2. Human welcome + why this exists
3. Four doors: Begin / Library / Land / Community
4. Real proof and featured guides
5. Flowing-suns divider
6. Quiet invitation + rooted footer

Scroll-stopping without becoming noisy.

Above the fold

Awakening Eden, one regenerative promise, primary action and a visible part of the portal. No long manifesto.

First proof

Use a real human or land image immediately after the threshold. Enchantment meets trust.

Shorten

Keep introductions to 2-4 lines. Move deeper philosophy into expandable or later reading sections.

Do not repeat the portal, hero message, community image or identical CTA in consecutive sections.

Outcomes and proof before process.

Water held

Slow, sink and spread rainfall

Living soil

Cover, roots and biomass

Abundant edges

Layered edible habitats

Clear pathway

Assessment to implementation

Opening sequence: strongest completed project / four clear outcomes / Projects Benjy Created gallery preview / Tell Benjy about your land. Deeper methods follow.

A garden of knowledge, not a database.

Find a doorway

Regenerate land / nourish body / expand perspective / build community. Four doors, not endless category tiles.

See what is real

Finished guides are primary. Coming-soon resources remain hidden or clearly secondary.

Human warmth

Use the rooted-human portal and real learning scenes to balance books, films and educational boards.

Moonlit teal may hold reading, reflection and films; practical regeneration remains rooted in parchment, forest and real images.

One small moonlit entrance, four clear paths.

Use a compact portal emblem, subtle stars/seeds and one flowing line. Avoid oversized stacked buttons and repeated descriptions.

Clear choices inside a living atmosphere.

Doorway card

Short title, one sentence, one destination, meaningful art or icon. Entire card is clickable.

Guide card

Clear state, concise promise, visible format and one action. No badge-heading-copy-arrow overload.

Buttons

Verbs first, 44 px minimum touch height, visible focus, forest or terracotta primary and clear outline secondary.

No auto-rotating carousels. Galleries open accessibly with visible close, swipe, arrows, captions and keyboard support.

Real projects remain the trust layer.

Edit honestly

Lift shadows, calm harsh highlights and preserve true materials, people, land and project state.

Pair views

Wide context + work in action + tactile detail + before/after from the same viewpoint whenever possible.

MOTION

Movement should feel like growth.

Reveal

250-500 ms fades and slight upward movement. Essential content remains available without animation.

Living detail

One subtle water shimmer, drifting seed or line drawing at a major portal only.

Never

No autoplay sound, sparkle fields, parallax nausea, delayed controls or decorative motion on every card.

Honor prefers-reduced-motion and avoid continuous animation on the primary logo.

Wonder must remain usable and light.

- 4.5:1 body-text contrast
- 44 px touch targets
- Visible focus states
- Semantic headings
- No text baked into art
- Descriptive alt text
- Keyboard lightboxes
- Reduced-motion support
- AVIF + WebP picture sources
- Explicit image dimensions
- Only hero eager
- No hidden duplicate downloads

A quiet root system, not another hero.

One reversed emblem. Live text. Useful links. A short closing blessing. Deep forest background, honey and parchment highlights, generous breathing room.

Never: duplicate logo, stretched painted portal, dark-on-dark mark, or a second oversized call-to-action wall.

IMPLEMENTATION ORDER

Integrate carefully after Claude's current pass.

- 1. Create a checkpoint from the latest deployed HEAD.**
- 2. Add tokens and logo family; repair header/footer first.**
- 3. Integrate portal only at chosen thresholds.**
- 4. Apply the page rhythm and shorten repeated introductions.**
- 5. Use real proof before deeper explanation.**
- 6. Validate routes, assets, JSON-LD, contrast, keyboard and responsive layout.**
- 7. Test deployed Lighthouse; do not estimate scores.**
Preserve existing routes, content, forms, Netlify configuration and honest project claims.
